Name: Sarah Conley

Department: Clerk

What do you consider the best part of your job?

I really enjoy my co-workers. I think we may share similar mental disorders. (LOL) 😂

What do you enjoy reading?

Mostly horror, mystery and suspense.

What do you like to do in your free time?

Draw, paint, read, play with my kids and our Doberman.

Puzzle Swap—Have some extra puzzles you'd like to get rid of? Bring them in to our puzzle swap and exchange them for a new one to take home!

February 1st and 29th, 6 pm.

This winter RPL and Rush Co. Soil & Water are teaming up to bring a limited book club to you...and it's all about water! Each participant (limited to 9) will receive their own personal copies of *How to Read Water: Clues and Patterns from Puddles to the Sea* by Tristan Gooley and *The Three Ages of Water* by Peter Gleick.

The Three Ages of Water by Peter Gleick (from Amazon)

A revelatory account of how water has shaped the course of human life and history, and a positive vision of what the future can hold—if we act now. From the very creation of the planet billions of years ago to the present day, water has always been central to existence on Earth. And since long before the legendary Great Flood, it has been a defining force in the story of humanity. In *The Three Ages of Water*, Peter Gleick guides us through the long, fraught history of our relationship to this precious resource. Water has shaped civilizations and empires, and driven centuries of advances in science and technology—from agriculture to aqueducts, steam power to space exploration—and progress in health and medicine.

But the achievements that have propelled humanity forward also brought consequences, including unsustainable water use, ecological destruction, and global climate change, that now threaten to send us into a new dark age.

How to Read Water: Clues and Patterns From Puddles to the Sea by Tristan Gooley (from Amazon)

Distilled from his far-flung adventures—sailing solo across the Atlantic, navigating with Omani tribespeople, canoeing in Borneo, and walking in his own backyard—Gooley share hundreds of techniques in *How to Read Water*. Readers will: Find north using puddles, forecast the weather from waves, decode the colors of ponds, spot dangerous water in the dark, and decipher wave patterns on beaches, and more!
